

WELCOME TO HANNOVER!

We are happy to welcome you to three days of engaged discussions and intense reflections about the future of RRI in Europe and beyond! The NUCLEUS project focuses on overcoming institutional barriers to Responsible Research and Innovation (RRI), for a better alignment of the research and innovation process with the values, needs and expectations of society.

This year's conference marks the mid-way point of the project and the exciting transition from capacity-building to implementation! NUCLEUS' goal is a long-term implementation of RRI in universities and scientific institutions. This culture depends on understanding the perspectives of all interacting stakeholders from policymaking, civil society, media, economy and public engagement.

Come and join a community of like-minded individuals who are developing a New Understanding of Communication, Learning and Engagement in Universities and Scientific Institutions.

Welcome to Hannover, Germany!
